

# SIGNAL SNOWBOARDS

14.15 SEASON

#signal\_life

## ***WELCOME TO THE 14.15 SIGNAL SEASON!***

We're excited to introduce two new Team boards this year: the Cody and the Danimals. They join the Freedom Machine Series along with our ever popular Jake OE and Yusaku models.

And in true Signal fashion, we've disrupted business as usual once again. We've narrowed our line to include only our very best boards—combining our favorite aspects from each line and reimagining them for this season. We've been unable to keep up with demand for our boards in past years so this year we're limiting our production and keeping things tight. That means that there is an exact amount of each board to be built and once they're gone, they're gone. Signal is embracing our boutique status.

We start with the aptly titled "Disruptor". This is the Camber/Flat board that encompasses all the very best parts of the OG and the Park series. There's nothing missing from this series and it's the best board for an all mountain choice. Black and white.

The Siren Maidens is the new line of boards for our women riders. These boards are hand painted with our spin-art and are as individual as a fingerprint.

The Troubadour is our newly designed rocker technology. With an all new profile and degree of lift, the Troubadour is a whole new board. And the graphic comes from a Talenthouse ( [talenthouse.com](http://talenthouse.com) ) contest we held this year with artists from all over the world. This year's winner is Canada's Cohen McDonald.

This year you'll see two boards in our line featuring the most ETT technology you've seen to date. The first is the Solar Hybrid. With Wavelength technology you're used to from our Omni, we took this board to the next level by adding solar panels to the board. Just like the ETT episode from Season 3, "Off the Grid; Solar Powered Snowboard", this board is also a charging station!

The second board you'll see out of ETT is yet to be announced. Rumors about this board have created quite the groundswell, but we can't drop the news until February 1st. You'll be the first to know when it's introduced to our line-up and you'll definitely want to add this board to your quiver. Until then...Aloha!

**SNOWBOARDS**

# ***FREEDOM MACHINES***

## ***CODY***

Cody's Freedom Machine has a sublimated topsheet and a knife-cut sintered Durasurf base in flopping black and white color ways.

All Freedom Machines are designed for Team Riders. They are built for the next level in freestyle riding—intermediate to advanced. They are as comfortable in the streets as they are on bigger park features.

### **OTHER CODY FREEDOM MACHINE FEATURES**

- ABS sidewall in blue
- Durasurf tip and tail fill also in blue
- Poplar Freedom Core — “freedom” core is bolstered underneath each binding to provide more strength where you need it most giving you what you’re used to in a park core flex on the tip and tail with reinforced thickness under the bindings
- triaxial glass on the bottom / triaxial glass on the top
- Radial sidecut that meets in the center of the board
- Blunt nose and tail shape

SIGNAL BOARD: CODY 150 FM	
EFFECTIVE EDGE	114 CM
SIDECUT	760 CM
NOSE & TAIL LENGTH	18 CM
WAIST	24.5 CM
NOSE & TAIL WIDTH	29 CM
STANCE	51 -63 CM

# FREEDOM MACHINES

## DANIMALS

Dan's Freedom Machine has a sublimated topsheet and a knife-cut sintered Durasurf base in flopping black and white color ways.

All Freedom Machines are designed for Team Riders. They are built for the next level in freestyle riding—intermediate to advanced. They are as comfortable in the streets as they are on bigger park features.

### OTHER DANIMALS FREEDOM MACHINE FEATURES

- ABS sidewall in bright green
- Durasurf tip and tail fill in bright orange
- Poplar Freedom Core — “freedom” core is bolstered underneath each binding to provide more strength where you need it most giving you what you’re used to in a park core flex on the tip and tail with reinforced thickness under the bindings
- triaxial glass on the bottom / triaxial glass on the top
- Radial sidecut that meets in the center of the board
- Round nose and tail shape

SIGNAL BOARD: DANIMALS 153 FM	
EFFECTIVE EDGE	117 CM
SIDECUT	780 CM
NOSE & TAIL LENGTH	19 CM
WAIST	25 CM
NOSE & TAIL WIDTH	29 CM
STANCE	51-63 CM

# ***FREEDOM MACHINES***

## ***JAKE O.E***

All Freedom Machines are designed for Team Riders. They are built for the next level in freestyle riding—intermediate to advanced. They are as comfortable in the streets as they are on bigger park features.

### **OTHER JAKE O.E. FREEDOM MACHINE FEATURES**

- ABS sidewall in black
- Durasurf tip and tail fill also in black
- Poplar Freedom Core — “freedom” core is bolstered underneath each binding to provide more strength where you need it most giving you what you’re used to in a park core flex on the tip and tail with reinforced thickness under the bindings
- triaxial glass on the bottom / triaxial glass on the top
- Radial sidecut that meets in the center of the board
- Blunt nose and tail shape

Jake’s Freedom Machine has a matte silkscreened top-sheet and a knife-cut sintered Durasurf base in flopping black and white color ways.

<b>SIGNAL BOARD: JAKE 151 FM</b>	
<b>EFFECTIVE EDGE</b>	<b>115.5 CM</b>
<b>SIDECUT</b>	<b>770 CM</b>
<b>NOSE &amp; TAIL LENGTH</b>	<b>18 CM</b>
<b>WAIST</b>	<b>25 CM</b>
<b>NOSE &amp; TAIL WIDTH</b>	<b>29 CM</b>
<b>STANCE</b>	<b>51 -63 CM</b>

# ***FREEDOM MACHINES***

## ***YUSAKU***

Yusaku's Freedom Machine has a sublimated topsheet and a knife-cut sintered Durasurf base in flopping black and white color ways.

All Freedom Machines are designed for Team Riders. They are built for the next level in freestyle riding—intermediate to advanced. They are as comfortable in the streets as they are on bigger park features.

### **OTHER YUSAKU FREEDOM MACHINE FEATURES**

- ABS sidewall in black
- Durasurf tip and tail fill also in black
- Poplar Freedom Core — “freedom” core is bolstered underneath each binding to provide more strength where you need it most giving you what you’re used to in a park core flex on the tip and tail with reinforced thickness under the bindings
- triaxial glass on the bottom / triaxial glass on the top
- Radial sidecut that meets in the center of the board
- Round nose and tail shape

#### **SIGNAL BOARD: YUSAKU 152 FM**

<b>EFFECTIVE EDGE</b>	<b>115 CM</b>
<b>SIDECUT</b>	<b>760 CM</b>
<b>NOSE &amp; TAIL LENGTH</b>	<b>18 CM</b>
<b>WAIST</b>	<b>24 CM</b>
<b>NOSE &amp; TAIL WIDTH</b>	<b>29 CM</b>
<b>STANCE</b>	<b>52 -64 CM</b>

# DISRUPTORS

The Disruptors are the newly designed Camber and Flat technology boards in the line. They have matte silkscreened top sheets with knife cut, rotating black and white bases. The Disruptors also have ABS sidewall in white, Durasurf tip and tail fill also in white, a Poplar Freedom Core — bolstered underneath each binding to provide more strength where you need it most, triaxial glass on the bottom / triaxial glass on the top, Radial sidecut that meets in the center of the board and a Blunt nose and tail shape.

	EFFECTIVE EDGE	SIDECUT	TIP & TAIL LENGTH	WAIST	TIP&TAIL WIDTH	STANCE
DISRUPTOR 150	114	759.5	18	24.5	29	51- 63
DISRUPTOR 152	115.5	770	18	25.0	29	51- 63
DISRUPTOR 154	117	780	18.5	25	29.5	51- 63
DISRUPTOR 156	118	790	18.5	25.5	30	53 - 65
DISRUPTOR 158	120	800	19	26	30	54 - 66

# SIREN MAIDENS

## WOMENS LINE

The Siren Maidens are handpainted, gloss spin tops. They have knife-cut Durasurf sintered bases that flop between black and white.

Other Siren Maiden Features include: ABS sidewall in black, Durasurf tip and tail fill also in black, Park Profile Poplar core, triaxial glass on the bottom / triaxial glass on the top of the core, Radial sidecut in a Directional board and a True twin Park shape.

**SIGNAL BOARD: SM 142**  
**EFFECTIVE EDGE** 108 CM  
**SIDECUT** 719 CM  
**NOSE & TAIL LENGTH** 17/16 CM  
**WAIST** 23 CM  
**NOSE & TAIL WIDTH** 27 CM  
**STANCE** 50-62 CM

**SIGNAL BOARD: SM 146**  
**EFFECTIVE EDGE** 111 CM  
**SIDECUT** 739 CM  
**NOSE & TAIL LENGTH** 17.5/16.5 CM  
**WAIST** 24 CM  
**NOSE & TAIL WIDTH** 28 CM  
**STANCE** 51-63 CM

**SIGNAL BOARD: SM 148**  
**EFFECTIVE EDGE** 113.5 CM  
**SIDECUT** 745.5 CM  
**NOSE & TAIL LENGTH** 18/17 CM  
**WAIST** 24 CM

**NOSE & TAIL WIDTH** 29  
**STANCE** 52- 64

# *THE TROUBADOUR*

## *With Rocker Technology*

<b>SIGNAL BOARD:</b>	<b>TR 151</b>
<b>EFFECTIVE EDGE</b>	<b>115 CM</b>
<b>RIDING LENGTH</b>	<b>111 CM</b>
<b>SIDECUT</b>	<b>760 CM</b>
<b>NOSE &amp; TAIL LENGTH</b>	<b>18 CM</b>
<b>WAIST</b>	<b>24 CM</b>
<b>NOSE &amp; TAIL WIDTH</b>	<b>29 CM</b>
<b>STANCE</b>	<b>52-65 CM</b>
<b>SIGNAL BOARD:</b>	<b>TR 153</b>
<b>EFFECTIVE EDGE</b>	<b>117 CM</b>
<b>RIDING LENGTH</b>	<b>113 CM</b>
<b>SIDECUT</b>	<b>770 CM</b>
<b>NOSE &amp; TAIL LENGTH</b>	<b>18 CM</b>
<b>WAIST</b>	<b>24.5 CM</b>
<b>NOSE &amp; TAIL WIDTH</b>	<b>29 CM</b>
<b>STANCE</b>	<b>53-65 CM</b>
<b>SIGNAL BOARD:</b>	<b>TR 155</b>
<b>EFFECTIVE EDGE</b>	<b>118 CM</b>
<b>RIDING LENGTH</b>	<b>115 CM</b>
<b>SIDECUT</b>	<b>770 CM</b>
<b>NOSE &amp; TAIL LENGTH</b>	<b>18.5 CM</b>
<b>WAIST</b>	<b>24.5 CM</b>
<b>NOSE &amp; TAIL WIDTH</b>	<b>29 CM</b>
<b>STANCE</b>	<b>54-66 CM</b>

The Troubadour is our newly designed Rocker technology. With 5 degrees of lift, you'll notice a smoother transition up from the Rocker Length.

This graphic by Cohen MacDonald, is the Talenhouse Contest winner. Troubadours have a sublimated gloss top sheet and knife-cut Durasurf sintered bases that flop between black and white.

Other Features of the Troubadours include: ABS sidewalls in black, Durasurf tip and tail fill in black, Park Profile Poplar core, triaxial glass on the bottom / triaxial glass on the top of the core, a Radial sidecut that meets in the center of the board and a True twin shape.

# SOLAR HYBRID

**A POWERING STATION IN WAVELENGTH TECHNOLOGY**

The Solar Hybrid is more than a snowboard. It's a power station! The solar panel embedded into the topsheet collects energy from the sun and powers your electronics as you ride. Your board becomes a charging station.

Other Solar Hybrid features include Wavelength Technology, a gloss silkscreen topsheet, knife-cut Durasurf sintered bases that flop between black and white, ABS sidewalls in black, Durasurf tip and tails in black, Poplar core, Biaxial glass underneath with triaxial glass on top of the core, a radial sidecut, a True Twin shape in a Directional board.
