WELCOME

When we say shred, what do you think of? If grating cabbage or destroying classified documents did not come to mind, we're guessing you have a much more awesome image in your head right now. Boarding on the snow means a lot of different things to a lot of different people, but all that really matters at the end of the day is what it means to you. Airblaster's mission is to remind you that snowboarding is yours. Strap in and drop in to find nearly unlimited freedom to do whatever the heck you want. Use gravity to escape gravity. Haha, gravity, joke's on you! Butt check. Damn you, gravity.

Unlimited freedom is rare thing, and not one to take for granted. In our opinion, a fine shred is best enjoyed in the company of friends, old or new, who are equally as dedicated to doing whatever the heck they want on their board. In our world, we refer to this sort of freedom and irreverence as Staying Wild. Look out! Sometimes even the wildest among us will start to take things a little too seriously. That's where a good friend will speak up to remind you: Stay Wild!

OK.

So there are some things about snowboarding that are serious. One of these is the weather: Sunny creamy perfect bluebird or windy, flat light, icy, bone chilling, swampy, foggy, and monsoon-ish, with a chance of freezing rain. Now, how are you going to Stay Wild, happy, and free if you are wet and cold? You won't. This is where Airblaster outerwear, Ninja Suits, S.Layer, hats, goggles, socks, mid layer, touques, beanies, hoodies, and whatnots come in. As born and bred 'boarders, we design all Airblaster Original Fun Products the way we want and need them: to keep us warm and dry, and focused on terrain opportunities instead of weather challenges.

So if you aim to shred all day, even a slim chance of seriously crappy weather demands that you own gear that is thoughtfully designed and seriously functional. We make that. Fit is one of the most important aspects of both function and style, and our fits are dialed. As far as color, we'll let you choose Mild, Medium, or Wild, because how you look when you shred is up to you. Like we said, snowboarding is yours. Find some freedom in these pages, and just please don't forget to

Stay Wild!

OUTERWEAR FIT/FEATURES GUIDE

THE BEST FITS IN THE INDUSTRY AND TECH STORY YOU CAN UNDERSTAND

WATERPROOFING/BREATHABILITY

HERE IS THE GUIDE:

WATERPROOFING of fabric, in thousands of millimeters. This is a relative measure that indicates the height of a column of water that can be suspended above the fabric before water seeps through. **Higher number = more waterproof fabric.**

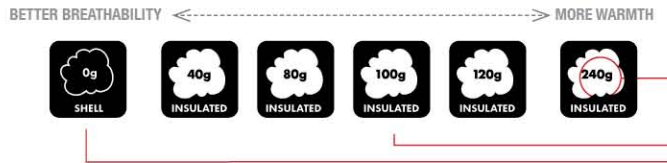

BREATHABILITY of fabric, measured in thousands of g/m²/24hrs. This number is a relative measure that indicates the amount of moisture that will pass through one square meter of fabric in 24 hours. **Higher number = more breathable.**

SEAM TAPING

FULLY TAPED indicates that all of the garment's seams have been taped to prevent moisture from entering at the seams. Fully Taped garments are the most waterproof option.

CRITICALLY TAPED indicates that only the most critical seams of the garment have been seam taped. By sealing only critical seams, the end garment is less expensive but still very waterproof for normal use in snow.

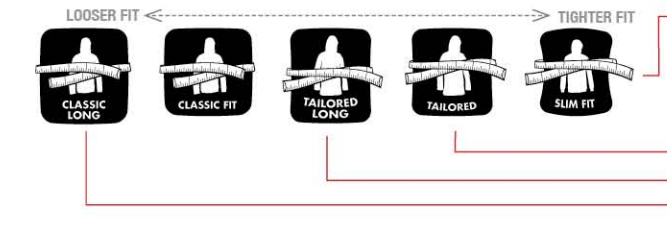

INSULATION is measured in grams. Higher number = More insulation.

INSULATED jackets provide more core heat retention than shells, and are comparatively warmer. Airblaster Jackets with 60 -150 grams insulation are considered medium insulation. Jackets with more than 150 grams of insulation are considered heavy insulation.

SHELL jackets provide maximum breathability. They have no insulation sewn into the jacket, allowing the user to customize the insulation by adding or subtracting layers worn underneath the shell. When combined with effective layering, shell jackets offer maximum versatility in a wide range of temperatures and conditions.

FITS

JACKETS

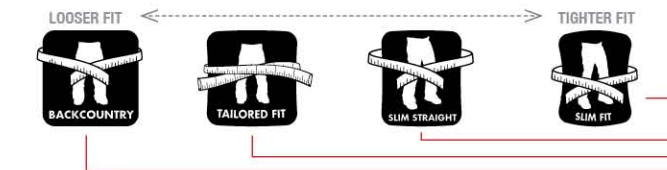

SLIM FIT: Our slimmest fitting jacket, closest to your street-style jacket fit.

TAILORED FIT: Not too tight, not too loose... just right. Slightly slimmer than traditional snowboard jackets, Airblaster Tailored Fit jackets have generous length in the arms and body, to keep you covered and looking good.

TAILORED LONG: Same fit as above, with additional length in the body.

CLASSIC FIT: Traditional snowboard jacket cut with adequate width in the arms and body, for ease of movement and easy layering. Not overly baggy unless you size up.

PANTS

SLIM FIT: Our slimmest pant fit, closest to your street-style pant fit. Developed with Nick Dirks for the original Sissy Pant.

SLIM STRAIGHT FIT: Based on our trademark Airblaster Slim Fit, the Slim Straight Fit is just slightly wider at the knees. Developed by Nick Dirks for his current pro model pant, the Step-Sister Pant.

TAILORED FIT: Not too tight, not too loose... just right. They taper in slightly at the knee, but still allow unrestricted freedom of movement. Our Tailored Fit was developed for the original Hip Bag Pant.

BACKCOUNTRY FIT: Traditional snowboard pant fit with a straight leg, for maximum freedom of movement. Not overly baggy, unless you size up.

WOMEN'S FITS

All Airblaster Women's Outerwear styles use the same fit descriptions as Men's styles, however all Women's styles incorporate a Women's-specific fit. Airblaster Women's fits are designed and developed by our female designer and the Women of the Airblaster Team.

NLGC= Next Level Game Changer. NLGC denotes a new Airblaster trademark style that is a guaranteed future classic. Don't be the last one aboard the style train! Get on board at the first stop, and let us help you help us continue to change the game. Stay one step ahead... Stay Wild! #NLGC

BY: AIRBLASTER

SON OF SASQUATCH
MAXIMUM TECHNICAL FEROCITY

Beast is Son of Sasquatch. Descended from a lineage of high alpine shred domination, Beast is the culmination of 12 years of evolutionary madness. Inspired and worn by the likes of Temple Cummins and Scott E. Wittlake, this is outerwear destined for legendary adventure. The union of minimalist Sasquatch design and maximal Vortex technology yields Airblaster's high throttle storm punching equipment. Featuring our fiercest fabrication to date, Vortex with Nanotex® Aquapel™ outperforms anything we've ever seen. If your idea of Staying Wild involves exploration into uncharted realms of the steep deepness, Beast is ready to take you further than you've ever been.

VORTEX™ 30k/20k

Lightweight, densely woven Vortex 30/20 laminated outer fabric is a proprietary Airblaster combination that outperforms even the coveted Back Door Tex. The tight structure of the micro doobby weave lends strength and natural water shedding ability, while keeping finished weight to an enlightened 152g/m². The measurable performance comes from the advanced backing laminate, which provides unmatched 30,000mm waterproofing, and 20,000g/m² breathability.

Aquapel™
by Nano-Tex®

Elevating Vortex fabric performance into the fourth dimension, Nanotex Aquapel is DWR on nuclear steroids. Mimicking the evolution-engineered water repellency built into the coats of wild animals, Aquapel modifies fabric on the molecular level, attaching hydrophobic molecules to individual fibers. The result of this proprietary process is a water repellent outer shield with unmatched function and durability. Aquapel is completely PFOA and FC free, making it among the most ecologically friendly fabric coating processes. Superior waterproofing starts with superior DWR, and Nanotex Aquapel is simply the best.

PERFECT PERIPHERAL™

Three optimized points of adjustment provide the foundation for Airblaster's Perfect Peripheral hood, creating a shape and fit that move with you instead of against you. Independent collar design allows you to quickly and easily deploy your hood without unzipping your jacket, for easy-on, easy-off performance and temperature regulation. Adapt quickly, see more clearly, and Stay Wilder with the Airblaster Perfect Peripheral Hood.

SNELCRO™ CUFF CLOSURE

A Snap + Velcro sandwich provides the ultimate function and versatility in cuff closure and adjustment. Use the Velcro for quick micro adjustments, or lock down the snaps when a positive lock is required. Why choose between peanut butter and jelly, when you can have the whole delicious sandwich? Mmmmm... Snelcro!

BEAST SUIT

If you want the Beast of the best, this is it. A virtually impenetrable force field of powder protection, the Beast Suit is an Airblaster Freedom Suit on steroids. Easy and Deadly haven't been this good of buddies since the light saber came out. It's like a 30K/20K Vortex Ninja Suit, but baggier so you bulge doesn't poke out. Slay powder like a Beast Ninja with a full body light saber force field! But less nerdy than that.

- Vortex fabric with Nanotex® Aquapel™
- 30K mm waterproofing
- 20K g/m² breathability
- Fully seam taped
- Tailored one-piece fit
- Beast Media Port with external device access
- 350° waist zipper for easy #2 bathroom access
- Zippered Swag Vents at lower leg
- Rip Stopper reinforced kick patch at heels
- Beast Claw trims package
- Adjustable velcro wrist cuff closure
- 2 zippered hand warmer pockets
- 2 zippered front pant pockets
- 2 zippered back pant pockets
- Mesh-lined inner leg and underarm vents
- Adjustable leg gaiters with lace hooks
- 2-way zipper at center front
- TOP SECRET lower leg stash pocket
- Lycra wrist gaiters
- YKK zippers throughout

GLACIER COLLECTION

MEN'S

Evolve quickly, and adapt easily to your environment. From vintage thrift-lifted styles that fit you perfectly, to fresh color blocking in classic silhouettes, our Glacier Series seamlessly incorporates pedigreed storm protection into chill level shred threads. We've mixed and matched four outerwear fabrics to offer a complete array of 15K/10K fully taped garments. With colors to satisfy the most discerning palate, Airblaster prints and solids span the full range from Mild to Wild. The result is a bountiful buffet of unparalleled outerwear flavor. Come hungry, leave satisfied... Stay Wild!®

GLACIER FABRICATION

MIDWEIGHT

At 210g/m², our new Glacier Midweight fabric offers a perfect balance of easy drape and dependable durability. Densely woven, yet lightweight, it looks at home in the streets, but won't weigh you down while hiking or taking flight.

GLACIER FEATURES

PERFECT PERIPHERAL™

Three optimized points of adjustment coupled with an independent collar design result in our most dynamic, comfortable, and versatile hood. Adapt quickly, see more clearly, and Stay Wilder with the Airblaster Perfect Peripheral Hood.

BABY TWILL

At 220 g/m², Baby Twill is a tried and true Airblaster staple. The fine twill texture and matte finish perform flawlessly on the mountain, but are equally at home in après and urban scenarios.

CANVAS

At 230g/ m², Airblaster Canvas is a classic rugged work cloth, enriched for high alpine adventure. We use this stuff where the main requirement is maximum ability to withstand sustained abuse.

STRETCH TWILL

At 260 g/m², our Stretch Twill is durability meets vintage feel, with a pinch of stretch thrown in for good measure. Stretch Twill is our go-to fabrication for Airblaster's benchmark slim fit Sissy and Brother's Pants.

SWAG VENTS™

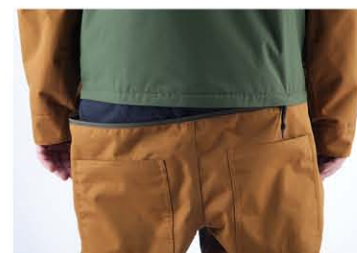

Let your ankles breath while simultaneously releasing your excess swag, mainly through your Airblaster lower leg Swag Vents. You better act like you know... Its AIRBLASTER, britches!

FREEDOM SUIT

The Airblaster Freedom Suit is the Ninja Suit of outerwear. It is simply the best protection available. Slash, porpoise, or scorpion through powder without any worry of snow invading your personal space. If you haven't experienced a nipple deep powder day wrapped in the safe, cozy confines of a Freedom Suit, you might not be living to your true potential. Yet.

350° waist zipper

THE FOREIGN ONE JACKET

By itself, the Foreign One Jacket is a simple, classic, versatile shell cut from our Midweight Glacier fabric. Zip the Airblaster Double Puff Jack into it, and the Foreign One magically transforms into a 4-in-1 Jacket. Perfect for that trip to Hokkaido, where packing four jackets would be nice, but spatial considerations limit you to carrying just one...The Foreign One.

- 15K mm waterproofing
- 10K g/m² breathability
- Fully seam taped
- Classic Fit
- Cuff and neck tabs to connect to Airblaster Double Puff Jack
- Cat Spray Media Hole with external player access
- Glacier Series trims package
- 2 zipper hand warmer pockets
- 2 snap closure chest pockets
- Mesh lined underarm vents
- Thumb loop at cuff
- Removable powder skirt with pass window
- Internal mesh goggle pocket
- YKK zippers throughout

BLAZING BUNDLE SYSTEM - SOLD SEPARATELY

Zip in the Double Puff Jack to create a 4-in-1 jacket system!

	1.) SHELL (15K)!		3.) LINER - REVERSE SIDE!!!
	2.) LINER (120 gm)!!		4.) SHELL + ZIP-IN LINER!!!!

TRENCHOVER

Like combining peanut butter and jelly, sandwiching the Trench Jacket and the Pullover together has yielded an instant classic, dripping with 90's flavor from MILD to WILD. The Trenchover has it all: deep neck zip for ventilation, full length side seam zip for easy entry and exit, stowable hood, and a drop tail to keep your butt dry and your shifties buttery.

- 15K mm waterproofing
- 10K g/m² breathability
- Fully seam taped
- Classic long fit
- Cat Spray Media Hole with external player access
- TOP SECRET packable hood inside collar
- Glacier Series trims package
- 2 zippered hand warmer pockets

SISSY PANT

If it ain't broke, then don't fix it. Just tweak it real nice. The Airblaster Sissy Pant is the original-and still the best--slim fit pant available, tweaked for 2015 to be better than ever. Heavy-duty stretch twill withstands abuse from run-ins with metal, wood, pavement, and even the razor sharp nails of ex-girlfriends. Hypothetically speaking.

- 15K mm waterproofing
- 10K g/m² breathability
- Fully seam taped
- Slim fit
- Zippered Swag Vents at lower leg
- Rip Stopper reinforced kick patch at heels
- Glacier Series trims package
- 2 zippered front pant pockets
- 2 zippered back pockets
- Mesh lined inner leg vents
- Adjustable leg gaiters with lace hooks
- Elastic waistband adjustment
- YKK zippers throughout

Black/Black Greybird/Black Olive/Kodiak Mushroom/Duck Dino

AB/BC JACKET

Brandon Cocard is a machine. What kind of machine? The kind that pops out 9 months after a Gibson Les Paul guitar has a three way with a Nintendo and a Rubik's cube. In other words, equal parts rock-and-roll, happy superhuman athlete with cool sound effects, and mystery puzzle. Nailed it. Now go check out his video parts in the latest Capita or Absinthe movie, then purchase, examine, and utilize the AB/BC Jacket to absorb traces of residual magic.

- 15K mm waterproofing
- 10K g/m² breathability
- Fully seam taped
- Tailored Long fit
- Cat Spray Media Hole with external player access
- Snelcro adjustable cuff closure
- Glacier Series trims package
- 2 zippered hand warmer pockets
- 2 zippered chest pockets
- 2 zippered front lower body snack pockets
- Mesh lined underarm vents
- Lycra wrist gaiters
- Removable powder skirt with pass window
- Internal mesh goggle pocket
- YKK zippers throughout

Black/Dino Olive/Puddle Storm Cloud/Black Oxblood Tie Dye

AB/BC PANT

Hi there. I'm the AB/BC pant. That stands for AirBlaster Brandon Cocard Pant. I've got knee patches and various color combinations from completely mild to totally wild. I'm sturdy, waterproof, and I look cool. I'll make your legs look awesome. When your legs look awesome, they feel awesome, and awesome-feeling legs pop, tweak, and stomp better than legs that just feel OK. Think about it.

- 15K mm waterproofing
- 10K g/m² breathability
- Fully seam taped
- Tailored fit
- Zippered Swag Vents at lower leg
- Rip Stopper reinforced kick patch at heels
- Glacier Series trims package

- Mesh lined underarm vents
- Lycra wrist gaiters
- Removable powder skirt with pass window
- Internal mesh goggle pocket
- Elbow patches
- YKK zippers throughout

Black Navy Stripe Taupe Duck Dino

CRANKY PANT

Nick Dirks' pro model pant. Ever been just a total crab dick to someone? It happens, especially if you haven't eaten enough food lately, your inner hangry is on full snap mode, and your pants are too tight. Our recommendation? Get some food in you, put on your trim-yet-unrestrictive Cranky Pants, apologize, and then get back to Staying Wild with your buddy. Prevent future outbreaks of crabbiness? Pack snacks in your Cranky Pants, and keep your crab dick on airplane mode.

- 15K mm waterproofing
- 10K g/m² breathability
- Fully seam taped
- Slim Straight Fit
- Zippered Swag Vents at lower leg
- Rip Stopper reinforced kick patch at heels
- Glacier Series trims package

OTHA-BROTHA PANT

Are you ready for adventure? These are pants fit for Women who look good and chop wood. Combining our most beloved Women's fit with our most rugged Airblaster Canvas, the Airblaster Otha Brotha Pant embodies the spirit of the sassy pioneer. If you like shopping but need gear that stands up to chopping, you have found your match.

- 15K mm waterproofing
- 10K g/m² breathability
- Fully seam taped
- Slim Fit
- Zippered Swag Vents at lower leg
- Rip Stopper reinforced kick patch at heels
- Glacier Series trims package
- 2 zippered front pant pockets
- 2 zippered back pant pockets
- Zippered thigh pocket
- Adjustable leg gaiters with lace hooks
- Mesh lined inner leg vents
- Elastic waistband adjustment
- YKK zippers throughout

MY BROTHER'S PANT

Which pant you say? Funny you should ask. My Brother's Pant is a rough-and-tumble classic with a slim and flattering women's fit. Airblaster's Stretch Twill 15K fabric has just enough stretch to conform to your curves and allow you full freedom of movement, while still protecting you completely from the elements. Details include contrast rear pocket and hidden leg vents. Combine with a play-all-day attitude for epic results.

- 15K mm waterproofing
- 10K g/m² breathability
- Fully seam taped
- Slim fit
- Zippered Swag Vents at lower leg
- Rip Stopper reinforced kick patch at heels
- Glacier Series trims package
- 2 zippered front pant pockets
- 2 zippered back pant pockets
- Zippered thigh pocket
- Adjustable leg gaiters with lace hooks
- Mesh lined inner leg vents
- Elastic waistband adjustment
- YKK zippers throughout

FREE DOM PLUS+

Blending 15K/10K Glacier fabric with Freedom silhouettes has spawned a hybrid strain of Airblaster outerwear: Freedom Plus. Utilizing Baby Twill extracted from the Glacier series, our master scientists have created genetically twisted Freedom Plus styles that emanate wave-stacking mutant powers. Secrets of alchemy were employed to meld black, storm cloud, and oxblood into color combinations that put the magical Mild back into Wild. YKK Aqua Guard® zippers up the ante in key zones. If you demand full-fledged Freedom, plus maximum storm protection, Airblaster Freedom Plus was built for you.

BABY TWILL
At 220 g/m², Baby Twill is a tried and true Airblaster staple. The fine twill texture and matte finish perform flawlessly on the mountain, but are equally at home in après and urban scenarios.

FREEDOM PLUS+ TOASTER JACKET

Like a Toaster Jacket juiced with nitrous, the Premium Toaster Jacket utilizes after market upgrades to elevate performance and storm protection to the next level. Premium 15K/10K twill borrowed from the Glacier Series is 50% more waterproof and 25% more breathable than standard Toaster fabric. YKK Aquaguard waterproof front zipper seals out the elements, and the exclusive black storm cloud color way speaks for itself.

- 15K mm waterproofing
- 10K g/m² breathability
- Critically seam taped
- Classic long fit
- 80g insulation
- Upgraded Glacier series fabric
- Aqua Guard® YKK zipper at center front
- 2 zippered hand warmer pockets
- Inner chest pocket with media cord port
- Rib knit cuff with thumbhole
- Mesh lined underarm vents
- Powder skirt with pass window
- Internal mesh goggle pocket

Storm Cloud/Black

FREEDOM PLUS+ CARGO PANT

Blacked out 15K/10K fabric with oxblood pop zippers push the Freedom Plus+ Cargo Pant up a full level. Your murdered-out legs will intimidate park features and cause passers-by to cover their children's eyes as you pass by. These bad boys are locked and loaded for heavy action, ready to rise up and crush any feature in front of them. The only question now is, are your legs ready to fill these pants?

- 15K mm waterproofing
- 10K g/m² breathability
- Upgraded Glacier series fabric
- Critically seam taped
- Tailored fit
- Zippered Swag Vents at lower leg
- 2 zippered hand warmer
- 2 cargo pockets
- 1 zipper back pocket
- Leg gaiters with lace hooks
- Mesh lined inner leg vents
- Shoelace waist adjustment
- YKK zippers throughout

Black

W'S FREEDOM PLUS+ BILLY JEAN JACKET

Enough waistline to keep it fine, and enough storm protection to keep you lapping no matter what Mother Nature throws at you. Because you prefer shredding to sipping hot cocoa, you'll appreciate the upgraded waterproofing, breathability, and durability of Airblaster's 15K/10K baby twill. If the standard Airblaster Billy Jean Jacket is a heartbreaker, the Freedom Plus+ Billy Jean is a straight up storm-thrashing man-eater.

- 15K mm waterproofing
- 10K g/m² breathability
- Critically seam taped
- Tailored fit
- 80g insulation
- Upgraded Glacier series fabric
- Inner chest pocket with media cord port
- Rib knit cuff with thumbhole
- Mesh lined underarm vents
- Powder skirt with pass window
- Internal mesh goggle pocket
- YKK zippers throughout

OxBlood/Storm Cloud

W'S FREEDOM PLUS+ FANCY PANT

Premium and Fancy are adjectives generally reserved for describing ketchup. However, these Airblaster Premium Fancy Pants are heavily laden with a sauce better described as spicy hot nighttime wild black jaguar milk. So hot, its actually pretty cool. So when you're out there, spicing things up and staying wild, what sauce do you want to sprinkle on your legs, and the world? Personally, I'd go with the spicy hot nighttime wild black jaguar milk.

- 15K mm waterproofing
- 10K g/m² breathability
- Upgraded Glacier series fabric
- Critically seam taped
- Slim fit
- Snap closure Swag Vents at lower leg
- 2 zippered front hand pockets
- 2 zippered back zipper pocket
- Leg gaiters with lace hooks
- Shoelace waist adjustment
- YKK zippers throughout

FREE
DOM

10,000mm of water proofing means this: You can stack a column of water 10 meters (more than 30 feet high) on top of Airblaster Freedom fabric before water starts to penetrate through to the inside. Now I don't know where you plan to be lying under 30 feet of water, but I don't. 10,000mm is a lot of waterproofing, my friend. And 8000g/m² breathability is no slouch either, especially if you know how to unzip your vents or shed a layer when you start sweating profusely. Common sense, people... Freedom Series has everything you need and nothing you don't, at a price that won't send you into bankruptcy.

FREEDOM DOBBY
At 220 g/m2, Airblaster Freedom Dobby represents epic performance and value in one package. With a fine drape and 10,000mm waterproofing, Freedom has never felt or looked so good!

TOASTER JACKET

Preferred jacket of our AM team, the Toaster Jacket is built for the hungry man. It eats kickers, crushes cliffs, and munches boxes. It keeps you warm and ready to dominate the next progression session. Wait, did I say that this jacket munches boxes? Yes, I did say that. Stay Toasty, my friend.

- 10K mm waterproofing
- 8K g/m² breathability
- Critically seam taped
- Classic long fit
- Freedom Series trim package
- 80g insulation
- Aqua Guard® YKK zipper at center front
- 2 zippered hand warmer pockets
- Inner chest pocket with media cord port
- Rib knit cuff with thumbhole
- Mesh lined underarm vents
- Powder skirt with pass window
- Internal mesh goggle pocket

Black Puddle Denim Freedom Camo Rust

CARGO PANT

Our new Tailored Fit cargo pant combines mellow throwback vibes and chill colors with a fit that is on-point. The cargo pocket is designed to rest above the knee, because cargo banging against your dang kneecap sucks ass. Cut with enough freedom of movement to assure your progression is unrestricted, but not baggy enough to have you looking like last year's food court gangster. Get up in the Airblaster Freedom Cargo Pant, and find Freedom in large doses.

- 10K mm waterproofing
- 8K g/m² breathability
- Critically seam taped
- Tailored fit
- Freedom Series trims package
- Snap Swag Vents at lower leg
- 2 zippered hand warmer
- 2 cargo pockets
- 1 zippered back pocket
- Leg gaiters with lace hooks
- Mesh lined inner leg vents
- Shoelace waist adjustment
- YKK zippers throughout

Black Olive/Puddle Puddle/Navy Freedom Camo Rust

VINTERSARS JACKET

The return of the iconic outerwear piece that started it all, the Airblaster Vintersars jacket harkens back to the original daze, when Airblaster was the only company that said things like "Stay Wild!" or "Have fun with your Friends!" Now try to find a single snowboarding company that doesn't "echo" this sentiment in their marketing. Huh, that's weird. But you know the original when you see it. So whether you shred lines or shift paradigms, the Airblaster Vintersars Jacket will keep you dry and remind to you Stay Wild.

- 10K mm waterproofing
- 8K g/m² breathability
- Critically seam taped
- Classic Fit
- Freedom Series trims package
- Lycra wrist gaiters
- Adjustable velcro cuff closure
- Powder skirt with pass window
- Inner mesh goggle pocket
- Mesh lined underarm vents
- Internal chest pocket with media cord port
- YKK zippers throughout

Black/Cobra Olive/Rust Navy/White Freedom Camo/Black Tight White/Cobra

PRETTY TIGHT PANT

Keep a tight grip, but don't strangle your boys. Airblaster's legendary Slim Fit pants achieve this perfectly: Pretty Tight, but not too tight. Switch from park mode to street mode without a full kit change, and roll out for early morning shred missions without looking like you robbed a juggalo for his jeans. That's Pretty Tight.

- 10K mm waterproofing
- 8K g/m² breathability
- Critically seam taped
- Slim fit
- Freedom Series trim package
- Snap closure Swag Vents at lower leg
- Freedom Series trims package
- Freedom Dobby Fabric
- 2 front hand jean style pockets
- 2 zippered back pockets
- Mesh-lined Inner leg vents
- Leg gaiters with lace hooks
- YKK zippers throughout

Black Puddle Navy Freedom Camo Tight White

W'S BILLY JEAN JACKET

"People always told me, Be careful what you do. Don't go around breaking young girls' boys' hearts..." Sorry MJ, the Airblaster Billy Jean Jacket is guaranteed to break a young man's heart. Enough waist line to keep it fine, plus an adequate dusting of tomboy styling to make sure you're ready to rumble when the snow flies.

- 10K mm waterproofing
- 8K g/m² breathability
- Critically seam taped
- Tailored fit
- 80g insulation
- Freedom Series trims package
- 2 zippered hand warmer pockets
- Lycra wrist gaiters
- Powder skirt with pass window
- Inner mesh goggle pocket
- Mesh lined underarm vents
- Inner chest pocket with media cord port
- YKK zippers throughout

Black/Camo Navy/Puddle Denim/Black Rust/Olive

W'S FANCY PANT

When I was a kid, my ultimate favorite meal in the world was a short stack of buttermilk pancakes topped with strawberries and whipped cream, called "Fancy Pants" on the menu of the local diner. These slim fit pants are the snowboard outerwear equivalent of fresh buttermilk pancakes with strawberries and whipped cream. They're tasty, they look good, and they've got a great name: Fancy Pants!

- 10K mm waterproofing
- 8K g/m² breathability
- Critically seam taped
- Slim fit
- Freedom Series trims package
- Snap closure Swag Vents at lower leg
- 2 zippered front hand pockets
- 2 zippered back zipper pocket
- Shoelace waist adjustment
- Leg gaiters with lace hooks
- YKK zippers throughout

Black Olive Denim Rust

GOGGLES

Snow-proof breathable outerwear windows for your face, Air Goggles are now better than ever thanks to a variety of AirRADium coated lenses. Yes, AirRADium, which is one of the most rare forms of Obtanium. These are the goggles that have been independently verified and recognized to perform at the highest level--equal to or better than the most expensive and god-awfully tech eye covers on the market--yet they leave your face looking great and your wallet fat as ever. American designed, Japanese built MILF technology means most venerable fog free performance. Compared to Air Goggles, anything else works about as well as a blindfold.

Widescreen Vision: Our frame shape is wide, but rides close to your face, resulting in the widest field of vision of any goggle we've ever tried. Try them on and you'll see. Literally.

Ventilation: Around the frame, and on the front of the lens, Air Goggles have maximum ventilation. Ventilation means air circulation. Air circulation means that sweaty air can escape before it turns your goggles into foggies. More ventilation and air circulation mean fog-free vision for you.

MILF Technology: Airblaster's Moisture Impermeable Lens Function means that you have technology on your side in the battle against fog. That little circular membrane on the inside of the lens makes your life better. It works its magic by allowing air to pass in and out of the sealed space between your lenses, while keeping moisture out! Result: no water between the lens, and no foggies!
