

**WINTER 2016**

**#WEAREOK**

Welcome to the future. It's winter 2016 and man are we excited to be here, more alive than ever, living in the present, and loving the life that has emerged from our efforts in the past. This season marks 21 years for Smokin' Snowboards. Some of you reading this aren't even 21 years old, so when I say we have dedicated a lifetime of snowboarding, research, development, and love into the following line, it's no joke. The progression of dream to reality is never as clear as the path it takes to get there. Dreams are sort of an abstract map, they don't include the lessons learned, or the struggles you experience along the way. The things our dreams leave out are the most important. Our path from basement to present has been full of enlightenment. One of the most important things we have learned is to be "us", to focus our attention and intentions on our brand regardless of what the rest of snowboarding is doing. If you ask me, it's working.

Last fall we were awarded with a new accomplishment. Our Hooligan model landed a win in the Transworld Snowboarding Top Ten Good Wood test, while Nial's board won a Best Of Test from Snowboarder Mag, as well as being picked by Men's Journal as one of the "Best 9 Snowboards To Ride This Winter". The Jetson was heavily tested, ridden, and awarded features and accolades from multiple magazines. On more than one occasion we were astounded as the reality that in some snowboarding publications, Smokin' was gracing multiple pages, with multiple features, and honorable mentions. What a wild feeling to see something we have built from the ground up as an independent manufacturer and company, literally playing ball with the biggest and most heavily funded brands in snowboarding.

The following pages are a direct reflection of what we, as owners, designers, craftsmen and most importantly snowboarders believe snowboarding needs. These are our dream rides. As lifetime shredders we have evolved so the snowboards we make have as well and the 2016 Smokin' line shows it. We are allowed to make exactly what we want. We get to decide, through research and design, what does and doesn't work.

I hope during your look into the Winter 2016 catalog you get a clear understanding of not only who we are as snowboarders but also how that has influenced the design of the boards we are offering, and how those boards relate to you and your needs. If it wasn't for snowboarders like you, snowboarders like us couldn't do what we are doing. You are just as much a part of Smokin' Snowboards as we are. By buying rider made boards, you are directly involved in a positive future for snowboarding as a whole. We are OK with that!

THIS BOARD IS TOTALLY

# AWESYM

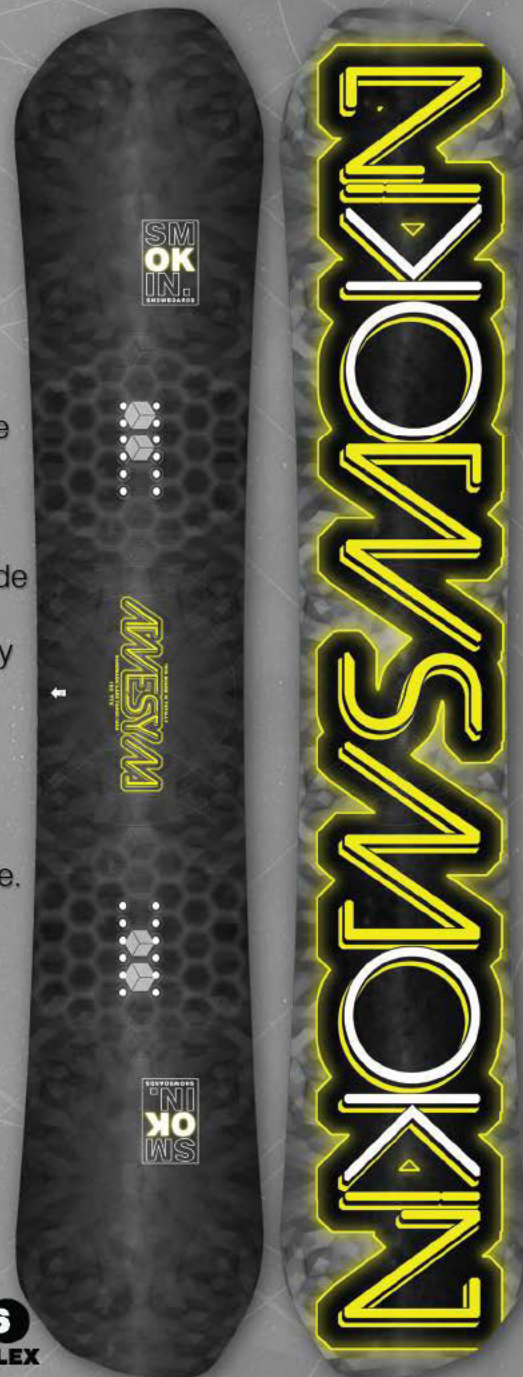

**148, 152, 156, 156W, 159, 159W, 162, 162W**

Humans are funny. We have so much symmetry in our bodies, we are essentially a mirror image from left to right but from a profile view we are very different. The Awesym copies this idea in the sense that from nose to tail this board is symmetrical and identical but from heel to toe the sidecut is different. In this way the Awesym is made to copy and improve upon these differences. Humans turn differently heel to toe side so this board does as well to compensate. Add our premium list of features, Mellow Mag and our award winning CTX rocker profile and you have literally, the best board we have ever made.

# BIG WIG

148, 152, 156, 156W, 159, 159W, 162, 162W

It was time. Our beloved Big Wig was ready for a redesign, so we threw out everything and started over from scratch. Now in a full range of sizes including wides, and sporting devilish new twin “dual swallow” tips, this newest shred sled in the Smokin’ fam. is made for all terrain destruction. We stuck our totally flat, from contact to contact ATX profile for an eager but forgiving ride which paired with our Mellow Mag is a perfect combination for riders of all skill levels. With the same list of features as our tried and true award winning models, you can guarantee the 2016 Big Wig is going to be a new favorite from Smokin’. The Pizzagram graphic salutes the best food in the world, paired with the new, best board in the world.

Eat pizza. Worship Smokin’. Ride a Big Wig.

CTX- ROCKER DOMINANT CAMBER COMBO

# TEAM // LTD.

148, 152, 156, 156W, 159, 159W

5  
FLEX

The fact that we give our riders full input in our design process is no secret.

The Team model is the result of the collective wants and needs of our whole Smokin' family. That said, the general consensus was that the Awesym sidecut needed to be the basis of the build. From there we added the team favorite, TTX rocker profile. For those that love the more aggressive MTX profile we added the Team LTD. which sports a much steeper kicked, and transition hunting nose and tail. Want to join the crew? Pick up a Team or Team Ltd. and ride the same stick our riders do to show that you, are OK. too. #IAMOK

# KT22

156, 159, 159W, 162, 162W

All new and totally redesigned for 2016, the KT22 was ready for a big change. As rider's needs and technology change so does design and the new KT22 represents that. Designed as a twin tip shape with a directional core, and style cues from the Jetson, this hybrid effective edge and sidecut design represents a perfect blend of traditional ideas and modern board engineering. Sporting our WTF profile with early rise tips and a longer blend area for extra float, the NEW 2016 KT22 is a freerider's dream. The ability to ride both ways equally well, while having a touch of extra beef in the backseat is the mix of new and old that creates a board of the future.

### CTX- ROCKER DOMINANT CAMBER COMBO

ROCKER CENTER WITH RAISED CAMBER TIPS MAKES FOR A FUN SKATEY AND FLOATY RIDE WHILE STILL MAINTAINING THE CAMBER STABLE ZONES NEAR THE TIPS.

### ATX- TOTALLY FLAT FROM CONTACT TO CONTACT

FLAT FROM CONTACT TO CONTACT MAKES FOR A VERY FUN AND SUBMISSIVE RIDE THAT IS LITERALLY WAITING FOR YOUR NEXT COMMAND

### DTX- FLAT UNDER FOOT ROCKER TO THE TIPS

FLAT UNDER FOOT WITH ROCKER TIPS MAKES FOR A FUN, PRESSABLE SKATEY RIDE THAT IS PERFECT FOR SLIDING IN AND OUT OF ROTATIONS AND LANDING ZEACH

### MTX- TRADITIONAL CAMBER

CAMBER FROM CONTACT TO CONTACT MAKES FOR A TRADITIONALLY STIFF AND RESPONSIVE RIDE THAT IS STABLE AND SNAPPY.

### WTX- EARLY RISE ROCKER NOSE CAMBER TAIL

EARLY RISE ROCKER NOSE MAKES FOR UNMATCHED FLOAT WHILE A CAMBER TAIL MAKES FOR A STABLE LANDING PLATFORM THAT PUNCHES THROUGH THE POW.

### WTF- EARLY RISE TIPS CAMBER UNDERFOOT

EARLY RISE TIPS FOR MEGA FLOAT IN POWDER AND A SKATEY FUN RIDE WHILE A CAMBER CENTER GIVES THAT SNAP AND STABILITY YOU NEED IN THE WILD.

Asymmetrical sidecuts varying in degree and radius compensate for natural bio mechanical shortcomings in a subtle but functional way

True Twin means identical from tip to tip, even on the Asym's. Go regs or switch with zero variance in ride including flex and sidecut.

Magnetraction licensed from Mervin Mfg. A series of "bumps" in the sidecut create a serrated knife blade effect for unequalled edge hold.

Our custom, proprietary, and secret epoxy blend has an injection of rubber to aid in dampening the ride and creating the toughest bond ever.

Whenever possible we use recycled plastics, reduce waste, in our processes, and reuse material to minimize our impact on our world. Better ecology through better quality

Skate Kicks by design are flat using only a short radius at the contact for exceptionally smooth buttery feel and a quick planing surface in soft snow.

Natural hemp stringers tune out vibrations and transfer energy from boot to contacts increasing response with unequalled pop.

Certified Renewable Good Wood Cores come from an ISC Certified Lumber mill. Hand selected and built without finger joints.

Two layers of fiberglass with a three axis weave sandwich the core. The criss cross pattern creates a tortinally consistent ride.

Variable Density Fiberglass Layup. An extra layer of secret material to reinforce high impact areas for longer board life and increased protection.

1/3 thicker than the industry standard and heat treated to Rockwell 48 standards for unmatched strength. Full wrap edges for life!

Dense, fast, and 1/3 thicker than the industry standard this UHMW base material is the toughest avail. Penetrate a layer of high fluoro One Ball Jay first wax and stay fast.

Three layers of dampening create a vibration free ride that leads to less fatigue and longer board life. 3X the industry standard.

Sintered UHMW sidewalls are strong and matched to our base material for a reliable, consistent flex and unmatched durability.

Unheard of in the snow biz our bummer replacement has you covered if you break your stick. contact us for detail on how to send it back and get another at a slightly discounted rate.

Fully sublimated graphics reduce ink waste and are more eco friendly and vibrant than screen printing. Add that to the R3 list yo.

Blunt tips are shorter than traditional radial tips creating more deck per cm. of overall lenght which lowers swing weight and increases effective edge.

We stand behind our boards with an industry leading 3 year warranty against manufacturer defects and craftsmanship to protect your investment.

156, 159, 162, 166

The basis for our entire Future Free Ride Series, the Pow-Wow is a all mountain, any condition, all skill level, super fun shred stick. Massive float in powder from it's early rise rockered tip, with a stable, cambered tail makes for an incredibly quickly turning surfy feel that any rider will have an epic day on. Step into the future, rip a Pow Wow.

## SPECS

WTX- EARLY RISE ROCKER NOSE CAMBER TAIL

# This board is FAWESYM!

**140, 144, 148, 153, 156**

Look at your face in the mirror, if you divide it down the middle you can see it is almost identical from side to side, turn 90 degrees and everything changes. Apply this test to your whole body and you get the same result. This is the basis of the design principals applied to the design of the Fawesym. Just like the Awesym the Fawesym is a true twin, all mountain destroyer, identical from center to tip and tail. Turn the board 90 and the sidecut changes, just like you do. These principals applied, compensate for your body's differences and balances them out to create a smoother ride which makes this board totally Awesym, but built for Females.

# PYT

**5**  
**FLEX**

**139, 143, 147, 152**

Pretty Young Thing. That doesn't mean all looks and no content. This shred stick is for the chick that rides, and it looks good too. Blunt tips for more effective edge and less swing weight means more control off the lip and easy steeze on spins. Mellow Mag with the rocker dominant/flat combo DTX makes for a skatey ride that locks in the turns. Park Flex gives a forgiving and super soft, comfy feel that combined with our Three Stage Dampening is easy like a sunday morning. The PYT has been a staple of the Smokin' girls line and a prime example of how a park inspired girls board should ride. Fierce and elegant, the 2016 PYT with it's retro future graphic is ready to prove your milkshake can school boys, not just bring them to the rail yard.
